Application/Control Number: 09/170,625

Art Unit: 2823

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 4/11/03 has been entered.

The proposed drawing correction filed on 4/11/03 has been disapproved because it is not in the form of a pen-and-ink sketch showing changes in red ink or with the changes otherwise highlighted. See MPEP § 608.02(v). Furthermore, the proposed drawing correction is disapproved because it raises doubt about whether the indicated drawings depict a conventional, prior art, process. The instruction to insert element 45 is not clear as to which element of the drawings is intended to be so labelled.

Claims 1-37 are rejected under 35 U.S.C. 103(a) as being unpatentable over the combination of Maekawa, Arai et al, Seung Ik Jun and Cristoloveanu et al.

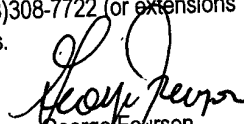

The rejection is maintained as stated in the paper mailed 1/13/03 and as follows.

The product of the process made obvious by the combination of Maekawa, Arai et al, Seung Ik Jun and Cristoloveanu et al would inherently possess the recited off current because the same materials are treated in the same manner as in the instant invention.
